Full Stack Developer with a total experience of 7 Years 9 Months. Have extensive experience in JavaScript, Typescript, NodeJs, NoSQL databases, and ReactJs for web development.

WORK EXPERIENCE

Full Stack Developer Cyvo

08/2020 - Present

Dubai, AE

Achievements/Tasks

- Used Javascript, Typescript, ReactJS, Vue, NextJS, frontend frameworks to create fluid and responsive UI.
- Used NodeJS, ORM and SQL/No-SQL to develop and manage databases.
- Worked with back-end developers to design APIs using Fetch API and Axios.
- Delivered performance-driven and user-centric applications that met all business requirements.
- Developed production ready Android and iOS applications with a design focus with React Native.
- Delivered performance-driven and user-centric applications that met all business requirements.

Computer Science Engineer Atos Syntel

12/2016 - 03/2020

Chennai, IN

Achievements/Tasks

- Worked with American Express (American Express Global Business Travel) to help them enhance their Global Document Delivery application. Stabilized the error prone version to be more market friendly and reliable as well as extended the app to include new features and an extended support for it.
- Implemented pure Javascript functions into React component.
- Worked to reduce any kind of discrepancies by applying extensive automations and create a bridge between development and operations by applying a software engineering mindset to system administration topics.
- Collaborate closely with product developers to ensure that the designed solution responds to non-functional requirements such as availability, performance. security, and maintainability.

SKILLS

JavaScript

Typescript

ReactJS

NextJS

HTML

PROJECTS

CRM System Development (09/2020 - 03/2021)

- Technologies used: React, NodeJS, ExpressJS, Javascript, Typescript, MongoDB, TailwindCSS, TSX, Context API, Redux Toolkit.
- Designed and developed a comprehensive Customer Relationship Management (CRM) solution to streamline client interactions, sales forecasting, and customer service activities for a multinational corporation.
- Utilized ReactJs, Javascript, Typescript for the frontend to deliver a responsive, intuitive user interface, allowing sales and marketing teams to manage customer information seamlessly.

Retail Application Development (04/2021 - 02/2022)

- Technologies used: React, NextJS, NodeJS, ExpressJS, Typescript, Javascript, MongoDB, TailwindCSS, TSX, Context API, Redux Toolkit, WooCommerce, Stripe.
- Utilized ReactJs for building a feature-rich web frontend, facilitating easy product search, virtual try-ons, and seamless checkout processes.
- Developed backend services using NodeJs and Typescript, integrating inventory management, payment gateways, and customer feedback systems.
- Deployed the platform on AWS, leveraging cloud capabilities to handle peak traffic during sale seasons without performance hitches.

Money Transfer Application (05/2022 - 01/2023)

- Technologies used: React, NextJS, NodeJS, ExpressJS, Javascript, Typescript, MongoDB, TailwindCSS, TSX, Context API, Redux Toolkit, Solidity.
- Conceptualized and developed a robust money transfer application catering to international transactions using FIAT and Crypto.
- Employed Typescript and NodeJs for building reliable backend services, managing currency conversion, user authentication, and transaction history.
- Implemented NoSQL databases for storing transactional data, ensuring fast retrieval and high redundancy.

EDUCATION

Master of Computer Applications SRM University

2013 - 2016

EDUCATION

Bachelor of Computer Applications NIT

2010 - 2013

ACHIEVEMENTS

Successfully led and delivered over 3 major web development projects within the stipulated time frames, consistently exceeding client expectations.

Consistently received positive feedback from stakeholders for transparent communication, understanding project requirements, and delivering beyond expectations.

Introduced cutting-edge coding techniques and tools that enhanced code quality by 20% and reduced debugging time by 30%.

PROJECTS

Global Document Delivery (2017 - 2020)

- Technologies used: HTML, CSS, Javascript, JQuery, AJAX, React, MySQL.
- Worked for fixing bugs in application called Global Document Delivery.
- Worked to reduce any kind of discrepancies by applying extensive automations and create a bridge between development and operations by applying a software engineering mindset to system administration topics.
- Implemented pure Javascript functions into React component.
